FINE FURNISHINGS

THE PLACE: For the past 37 years, **Heritage Lifestyle Home Furnishings** has been making a name for themselves as the go-to place in the GTA for inspirational and lifestyle furnishings. The family-owned and operated business is managed by brothers Keith and Sean Johnston, along with Keith's wife, Sharon. To offer customers the very best pricing and remain competitive, they often purchase in volume and keep most pieces in stock within their 20,000 sq. ft. showroom. With many Canadian-made pieces to choose from, they work with domestic suppliers whenever possible, something that is important to both the Johnstons and their customers. They also personally shop all over the world to ensure that every piece that enters the showroom reflects the quality their clients have come to expect.

THE STYLE: The Heritage team takes pride in offering exciting, unique and sometimes one-of-a-kind items, all of which they hand-select. The showroom is always changing, and shoppers can often come in to find something new and unique. Their specialty is solid-wood pieces, and the store showcases everything from reclaimed timber collections in rustic finishes to top-grain cowhide leather.

WHAT'S HOT: With a focus on both style and easy living, most of the pieces at Heritage Lifestyle Home Furnishings are ones that slide seamlessly into your space without having to change your style. Currently, there's a trend toward environmentally friendly, sustainable lifestyle collections created with recycled wood. Live-edge tables and dining pieces inspired by nature are extremely popular and can also double as statement pieces.

FAVOURITES: Much like the store's most popular items, favourites include the reclaimed timber collection, live-edge creations, down-seated upholstery and top-grain leather sectionals.
